EDUCATION

The University of Texas at Austin, Austin, TX — August 2025

Bachelor of Science in Computer Science

Minor in Applied Economics

Minor in Business

TECHNICAL SKILLS

- Frameworks, Runtime, & Storage: Node.js, NestJs, Next.js, PostgreSQL, Prisma, Redis,
- Infrastructure & Tools: Docker, AWS, Stripe, Kubernetes

PROJECTS

AI Supported Ticket Triage Platform

- Built an AI-driven ticket classification and routing system using OpenAI embeddings, pgvector, and Node.js, automating categorization of 1,000+ support tickets and reducing manual triage time by 82% in benchmark tests.
- Implemented semantic search over historical tickets using vector similarity queries in PostgreSQL, enabling automated response suggestions with 65% first-draft accuracy.

Distributed Task Scheduling System

- Engineered a distributed job scheduling system using Go, Redis Streams, and Docker, capable of executing 10,000+ queued tasks with automatic retry and load balancing.
- Implemented leader election and worker heartbeat mechanisms, enabling automatic task reassignment within 3 seconds of worker failure.

EXPERIENCE

Draaw App, Austin, TX — November 2025 – Present

Software Engineer

- Led end-to-end development of a multi-sport tournament platform alongside one engineer, designing system architecture, backend (NestJs), and deployment to support complex tournament formats and concurrent events.
- Engineered a constraint-based scheduling and progression system handling dynamic bracket generation, match advancement, and court/time allocation, reducing scheduling conflicts and supporting manual coordination
- Implemented production backend services and containerized deployment (Docker), including subscription gating (Stripe) and structured logging

Leadership & Community Involvement

Latin Economics Business Association, Austin, TX — January 2023 – May 2025

Project Manager, Vice President

- Budget for each academic semester to maximize educational and experiential benefits to 700+ members
- Administered and provided technical support for the mobile application utilized for member registration and event promotion
- Managed operations for large student gatherings, overseeing staffing, venue logistics, compliance, and promotional strategy.
- Engaged with organizations and prospective sponsors to establish key collaborative partnerships (Red Bull, PWC, Dell).
